6 ACCIDENTAL RELEASE MEASURES

Personal precautions

For personal protection, see section 8

Environmental precautions

Do not discharge onto the ground or into water courses. To prevent release, place container with damaged side up.

Spill clean up methods

Wear necessary protective equipment. Stop leak if possible without risk. Wash thoroughly after dealing with a spillage. Absorb in vermiculite, dry sand or earth and place into containers. Containers with collected spillage must be properly labelled with correct contents and hazard symbol. Dispose in accordance with applicable local, state and federal regulations. Storage:

Store product in the closed, original container in a cool, well-ventilated area away from direct sunlight. Check regularly for leaks or spills

8 EXPOSURE CONTROLS/PERSONAL PROTECTION

Exposure Standards:

2-Butoxyethanol- 8hr T.W.A. = 25 ppm, 15 min S.T.E.L. = 50 ppm
 Ethanol - 8hr T.W.A. = 1000 ppm,

T.W.A – The time-weighted average airborne concentration over an eight-hour working day, for five-day working week over an entire working life

S.T.E.L. (Short term Exposure Limit) – the average airborne concentration over a fifteen minute period which should not be exceeded at any time during a normal eight hour working day. According to current knowledge this concentration should neither impair the health of, nor cause undue discomfort to, nearly all workers
